Hsenid Software Lanka, Borella 2024 - 2025
Full-stack software developer skilled in Flutter, Angular, Spring Boot, and database systems, with experience in building and optimizing applications.

Projects

Crisis360

[Github Link](#)

Crisis360 is a mobile-based disaster management system that enables real-time safety confirmation, SOS alerts, and hazard mapping using AI-driven insights. It improves communication between civilians and emergency services to ensure faster response and safer communities.

HappyPaws

[Github Link](#)

A MERN stack project designed to help manage pet animal health by tracking medical records, vaccinations, and appointments in one place. It allows pet owners and veterinarians to easily monitor and improve pet health through a simple web application and ML.

Yoga Master

[Github Link](#)

A MERN stack yoga website developed to help users explore yoga programs, book sessions, and follow wellness routines online. It provides a simple platform for managing classes, instructors, and user progress in one place.
